TRUCKING

## WHO WE ARE

# About Maaksheshwe

**A South African plant hire, construction and trucking company built to keep mines and sites productive.**

Maaksheshwe, the trading name of GushLamaGesh (Pty) Ltd, supplies yellow machinery, large tipper trucks and site services to the mining and construction sectors. Based in Middelburg, in the heart of Mpumalanga's coalfields, we are close to the operations we serve and ready to mobilise quickly.

Our fleet of wheel loaders, excavators and mining trucks is backed by experienced operators, planned maintenance and on-site support. Whether a client needs a single machine on dry hire or a fully operated load-and-haul team, we provide equipment and people that deliver safe, measurable production.

We work closely with mine owners, contractors and logistics partners, and we measure our success by our clients' uptime, tonnes moved and safety performance.

## Our Vision

To be the most reliable plant hire, construction and haulage partner to South Africa's mining industry, known for equipment that works and people who deliver.

## Our Mission

To supply well-maintained machinery, skilled operators and responsive service that keep our clients' operations safe, productive and on budget, while creating jobs and growth in the communities where we work.

## OUR VALUES

**01**

### Safety

Zero harm on every site, every shift.

**02**

### Reliability

Machines available when you need them.

**03**

### Integrity

Honest pricing and clear agreements.

**04**

### Efficiency

More tonnes per hour, less downtime.

**05**

### Community

Local jobs, skills and suppliers.

## WHAT WE DO

# Mining & Construction Services

01

## Plant Hire

Wet and dry hire of yellow machinery for short- and long-term contracts.

- Wheel loaders, excavators and support equipment
- Operated (wet) or bare (dry) hire
- Flexible daily, monthly and contract rates
- Planned maintenance and breakdown support

02

## Mining Support Services

Load-and-haul capacity for opencast and stockpile operations.

- Run-of-mine (ROM) and product loading
- Overburden and waste removal
- Stockpile management and rehandling
- Train and truck loading at sidings

03

## Construction & Civil Works

Earthmoving and site works for mining infrastructure and general construction.

- Bulk earthworks and excavation
- Site clearing, levelling and platforms
- Haul road construction and maintenance
- Dams, berms and drainage works

04

## Trucking & Haulage

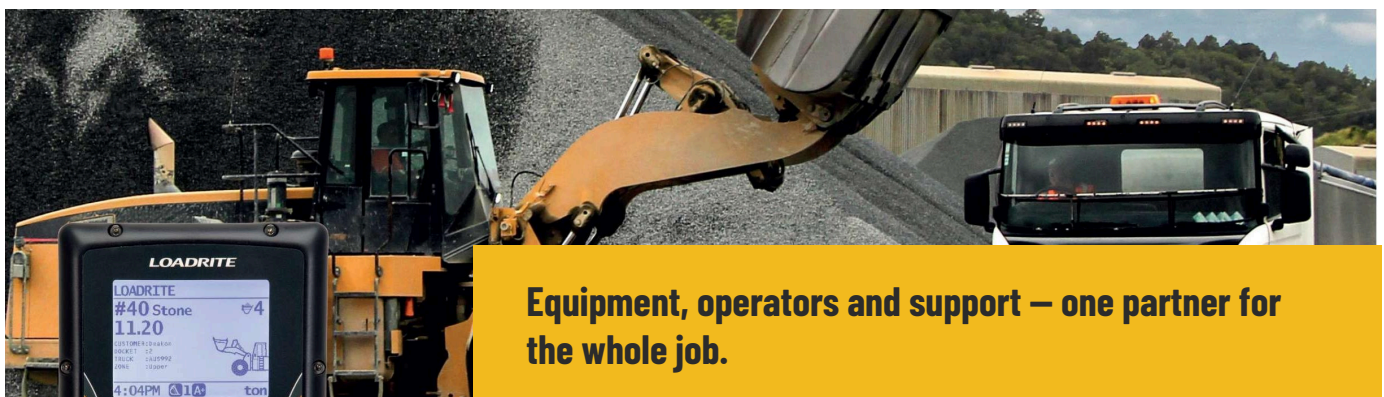

Large tipper and mining trucks for in-pit and road haulage.

- Coal, ore and aggregate haulage
- In-pit hauling with off-highway mining trucks
- Mine-to-siding and mine-to-plant transport
- Load tracking and tonnage reporting

05

## Equipment Supply & Productivity Technology

Supply and installation of equipment and onboard technology that helps clients get more from every machine, such as Loadrite onboard weighing systems for wheel loaders, which prevent overloading, optimise loadout and track productivity in real time.

**Equipment, operators and support – one partner for the whole job.**

## EQUIPMENT

# Our Fleet

## WHEEL LOADER

## RB876 Wheel Loader

Heavy-duty loader for high-volume loading in mines and quarries, powered by a Weichai engine with ZF automatic transmission.

**7 000 kg**

Rated load

**4.2 m<sup>3</sup>**

Standard bucket

**199 kW**

Rated power

## CRAWLER EXCAVATOR

## CDM6490 Excavator

50-tonne class excavator for bulk earthmoving, overburden removal and mine loading, with an Isuzu engine and Kawasaki hydraulics.

**50 500 kg**

Operating weight

**2.6 m<sup>3</sup>**

Rock bucket

**300 kW**

Rated power

## OFF-HIGHWAY MINING TRUCK

## CMT96 Mining Truck

Rigid mining truck for heavy-haul pit and quarry operations, with a 6-speed automatic gearbox and Weichai engine.

**60 000 kg**

Payload

**30 m<sup>3</sup>**

Body capacity

**390 kW**

Rated power

### Full Fleet Register

| Equipment         | Model                 | Class / capacity                           | Units |
|-------------------|-----------------------|--------------------------------------------|-------|
| Wheel loader      | RB876                 | 4.2 m <sup>3</sup> bucket · 7 t rated load | 2     |
| Excavator         | CDM6490               | 50 t class · 2.6 m <sup>3</sup> bucket     | 2     |
| Mining truck      | CMT96                 | 60 t payload                               | 2     |
| Tipper trucks     | PowerStar             | 34 t side tipper                           | 5     |
| Support equipment | Water bowser · Grader | 1 water bowser · 1 grader                  | 2     |

Detailed datasheets for each machine are available on request.

## OUR ADVANTAGE

# Why Choose Us

01

**Local to the coalfields**

Based in Middelburg, close to Mpumalanga's mines, for fast mobilisation and support.

03

**Skilled operators**

Trained, competent operators who keep machines productive and sites safe.

05

**Measurable production**

Onboard weighing and load tracking so clients see tonnes moved, not estimates.

02

**Mining-grade equipment**

Machines sized and specified for the demands of opencast mining and heavy haulage.

04

**Uptime focus**

Planned maintenance and responsive breakdown support to minimise downtime.

06

**Flexible contracts**

Wet or dry hire, short-term or long-term, scaled to each project.

**Safety, Health, Environment & Quality**

Safety is non-negotiable. We work to the requirements of the Mine Health and Safety Act and each client's site standards.

- Site inductions and pre-shift risk assessments
- Daily pre-use inspections on every machine
- Operator training and competency records
- Incident reporting and corrective actions
- Dust, spill and waste control on site

GET IN TOUCH

# Let's get your site moving.

Talk to us about plant hire, mining support, construction or haulage. We'll put together the right equipment and team for your operation.
